PROFESSIONAL SUMMARY

B.Tech and Data Science trainee at Brototype who builds end-to-end data and machine learning solutions, from data cleaning, EDA and statistical modelling to predictive models, interactive Power BI and Tableau dashboards, and CI/CD-tested deployments. Hands-on across Python, SQL, Scikit-learn, Deep Learning, NLP, PySpark and cloud tooling, with 9 portfolio projects spanning telecom, e-commerce, finance, healthcare and industrial analytics. 1st prize winner at a hackathon and HackerRank SQL certified.

TECHNICAL SKILLS

Programming & Data: Python, SQL, NumPy, Pandas, Matplotlib, Data Structures & Algorithms, Data Wrangling, EDA

Machine Learning & AI: Scikit-learn, XGBoost, TensorFlow, PyTorch, Regression, Classification, Clustering, Ensemble Learning, CNN, RNN, NLP, Time-Series Forecasting, Anomaly Detection, Recommender Systems

Generative AI: Transformers, Hugging Face, LLMs, Prompt Engineering, RAG, LangChain, LlamaIndex, Embeddings, FAISS, Chroma, LoRA / PEFT

Visualization & BI: Power BI (DAX, Power Query), Tableau, Data Storytelling, Interactive Dashboards

Big Data, Cloud & ETL: PySpark, Spark MLlib, Hadoop, AWS, Azure, GCP, Apache Airflow, Data Warehousing, ETL Pipelines

MLOps & Backend: Flask, FastAPI, Django REST, Docker, Kubernetes, Git / GitHub, CI/CD (GitHub Actions), Pytest, Pylint, Microservices

Databases & Statistics: MySQL, PostgreSQL, MongoDB, Hypothesis Testing, Probability, Linear Algebra, A/B Testing

PROJECTS

Industrial Operations Intelligence Platform (Capstone) | Python, Machine Learning, MLOps, Deployment [GitHub](#)

- Designed an end-to-end analytics platform for industrial operations: data ingestion, cleaning, ML modelling and visual insights for operational decision-making.
- Applied MLOps practices (version control, containerisation, automated testing and deployment) to move the solution from notebook to a live application.

Face Recognition Attendance System | Python, OpenCV, Deep Learning, Computer Vision [GitHub](#)

- Built a system that detects and recognises faces from images and live video to mark attendance automatically, replacing manual roll calls.

Telecom Churn Analytics | Python, Pandas, Scikit-learn, EDA [GitHub](#)

- Analysed customer behaviour and trained classification models to predict churn and identify the key drivers, supporting customer retention decisions.

Power BI Business Intelligence for Telecom Analytics | Power BI, DAX, Power Query, Data Modelling [GitHub](#)

- Built an interactive dashboard with a modelled dataset and DAX measures to track telecom KPIs, customer segments and revenue trends.

E-Commerce Analytics ML | Python, Machine Learning, Segmentation, Forecasting [GitHub](#)

- Applied customer segmentation and predictive modelling to e-commerce data to uncover buying patterns and support sales and marketing strategy.

Student Performance Automation (Pytest, Pylint, CI/CD) | Python, Pytest, Pylint, GitHub Actions [GitHub](#)

- Implemented unit tests, linting and a GitHub Actions CI/CD pipeline to automatically test, validate and deploy a student performance application.

Invoice Analysis & Prediction | Python, Pandas, Machine Learning [GitHub](#)

- Analysed invoice data and built a predictive model to forecast invoice outcomes and highlight patterns in payments.

Covid-19 Prediction Model | Python, Time-Series, Machine Learning [GitHub](#)

- Developed a predictive model on Covid-19 data to forecast case trends, with data preprocessing and model evaluation.

Stock Prediction | Python, Time-Series Forecasting, ML [GitHub](#)

- Built a stock price prediction pipeline covering data preparation, feature engineering, model training and evaluation.

EDUCATION & TRAINING

Data Science Training | Brototype, Kochi, Ernakulam, Kerala, India

Ongoing

- Full ML lifecycle: statistics, data wrangling, classical ML, deep learning, NLP, LLMs and RAG, Big Data (Spark), SQL, cloud, MLOps, APIs and BI.

B.Tech | IES College of Engineering, Thrissur, Kerala, India

2021 – 2024

Higher Secondary (10th, +1, +2) | Chaldean Syrian HSS, Thrissur, Kerala, India

CERTIFICATIONS & ACHIEVEMENTS

- HackerRank SQL Certification** – verified SQL proficiency
- 1st Prize, Hackathon** – B.Tech final-year project, IES College of Engineering
